

ORLANDO FSDO FAA Safety Team presents:

OWNER / OPERATOR PERFORMED MAINTENANCE and how it benefits you

As an aircraft owner / operator, do you know which maintenance actions Part 43 allows you to perform, and what the requirements are if you do perform any maintenance? Are you familiar with the term "Aging Aircraft"? Should you preflight your aircraft any differently after it has been in for maintenance? What does corrosion look like and why does it matter?

If you would like to hear the answers to these questions, see some great visual examples and more, please join us when Inspector Mark Laughridge, Orlando FSDO FAASTeam Program Manager presents, "Owner / Operator Performed Maintenance".

Attached to this notice is an FAA produced pamphlet which embodies the topic of this event. In addition, an Advisory Circular (updated AC-43-12A, with change 1) regarding preventive maintenance is also attached. The AC as well as the pamphlet are free to download! Wide distribution is encouraged!

This is an interactive presentation; audience participation is welcome!

Event Details

Thu, Aug 29, 2019 - 18:00 EDT

**POLK STATE COLLEGE -
AEROSPACE AIRSIDE**

2949 Airside Center Drive
Lakeland, FL 33811
