

Orlando FSDO FAA Safety Team presents:

Beech F33A Forced Landing Brief and Coexisting with a Drone or Gyroplane in a Fixed Wing World

The Treasure Coast FAASTeam is proud to host a two-hour seminar presented by Dr. William Hensley and Raul A. Salazar, Ph.D., CFI. Dr. Hensley recently made a successful forced landing on US 1, near Hobe Sound, with his Bonanza F33A. Bill will brief us on his experience and takeaways from the event. (Background on incident; <https://tinyurl.com/y6kqml9t> & <https://tinyurl.com/yx2a5zoz>). Mr. Salazar's presentation is to emphasis safety around traffic patterns, communications and phraseology, regulatory requirements, and recommended operational procedures used by drones and Gyroplanes around an airport without a control tower, or an airport with a control tower that operates only part time.

The Orlando FSDO-15, along with your Treasure Coast FAASTeam, encourages all aviation minded people to attend our every third Thursday of the month safety seminars. It doesn't matter the certificate or rating you hold, if you know somebody with an interest in aviation, whether it's your mechanic, another pilot, your right seat buddy or just somebody with as much interest in aviation safety as you do, please bring that friend with you to one of our next seminars.

Event Details

Thu, Mar 19, 2020 - 19:00 EDT

FlightSafety Academy

3530 Cherokee Drive

Classroom M

Vero Beach, FL 32960

Contact: TIMOTHY PAUL WHALEN

(772) 812-1861

twhalen134934@comcast.net

Select #: SO1598361
