

Orlando FSDO FAA Safety Team presents:

HALO Installation in the Piper M-600SLS

The new HALO Safety System recalibrates the scale of safety by incorporating innovative technology that is designed to enhance situational awareness while also providing autonomous safety features that can engage automatically or manually if ever needed. Incorporated as a standard feature on all M600/SLS products, HALO includes the most significant advancement in recent general aviation history: Garmin Autoland, winner of this year's Collier Trophy. HALO also includes safety features like Automatic Level Mode, Autothrottle, Hypoxia Recognition System with Automatic Descent Mode, SafeTaxi, TerminalTraffic, SurfaceWatch and Flight Stream 510. Come learn about HALO in this FREE live 2-hour seminar! WINGS and AMT Credit available!

Directions: Each meeting is held in a classroom inside the Skyborne Airline Academy maintenance hangar, which is located just west of the Vero Beach Regional Airport Main Terminal Bldg. Please note that Skyborne Airline Academy is the new name of the former FlightSafety Academy facility. Enter through the west side of the hangar, meeting is in Classroom M. Plenty of parking for cars and aircraft. For those of you flying in, park by the C.J. Cannon's restaurant at main terminal and walk west 100 yards.
