

Orlando FSDO FAA Safety Team presents:

Energy Management Introduction

An introduction to the principles of Energy Management (EM) for pilots. Many aviation accidents and incidents are enabled either by having too much or not enough total energy in the aircraft. If a pilot can manage his aircraft's total energy between the two extremes, the chances of a safe flight are vastly improved. This very popular presentation has been updated and blends theory with some practical applications the audience can begin using immediately, and delves into an accident scenario where EM was a critical factor. Free to attend, and no math required!

The Orlando FSDO-15 FAA Safety Team (FAASTeam), along with your local Treasure Coast FAASTeam, encourages all aviation safety minded individuals to come and attend our monthly safety seminars.

Directions: Aviator College Academics building

Google link for Aviator College:

<https://goo.gl/maps/D5KJffExQQip2YRw5>
