

My Aging Aircraft - Is it Airworthy?

Are you ever concerned about flying an aircraft that may be as old (or older) than you are? Just like you and me, the aircraft we fly are getting older; however, they may not be able to communicate directly with us to tell what “ailments” they may be experiencing. It’s up the pilot to perform a thorough preflight inspection, monitor the aircraft during flight, and conduct a post flight review to assure the airplane is safe for our intended flight and will be ready to fly the next occasion we choose.

Unless, you are able to afford a brand new Cirrus, Piper, Cessna, or Beechcraft, we are all flying “aging aircraft,” either rented or owned. It is essential to know what clues can assure us of a safe flight or to make a wise decision not to fly.

Event Details

Tue, Oct 31, 2023 at 19:00 EDT

**Daytona Beach International
Airport**

700 Catalina Drive
Dennis R McGee Room
Daytona Beach, FL

Contact: JOHN 'Jack' MENDES
