**Lead Representative Raul Salazar  
n/a**

Please join us for an in-depth description and discussion of the FAA's WINGS Pilot Proficiency Program. Rich Funcheon is a Vero Beach FAA Safety Team Lead Representative and aviation instructor at Florida Institute of Technology (FIT). He has been appointed by FAA as a WINGS Pro. Rich is most current on the program and is a program mentor. He has also been awarded monetarily as a result of completing certain aspects of the program — you can make money too — hear how!

The WINGS - Pilot Proficiency Program is based on the premise that pilots who maintain currency and proficiency in the basics of flight will enjoy a safer and more stress-free flying experience. The objective is to address the primary accident causal factors that continue to plague the general aviation community. By focusing on this objective, the FAA hopes to reduce the number of accidents with the same causes. It is not a simple "Award" program but is instead a true proficiency program, designed to help improve pilot skills and knowledge.

Each meeting is held in a classroom inside the Skyborne Airline Academy Vero Beach maintenance hangar, which is
