

Pre-flight and In-flight Weather Resources

- More pre and in-flight weather information is available than ever before but with that wealth of information comes complexity. Pilots must be comfortable with their choice of weather information services and they must be competent in making critical flight decisions based on assessments of the information provided.
- A thorough understanding of weather information resources capabilities and limitations is essential to safe flight.
- Weather information procurement and weather decision making should be covered in any proficiency training program.

From I-95 exit 220 turn east on Garden Street (406) approximately three miles, turn left on North Williams Ave. approximately 1 mile on the left. Building 10, in the class room.

A message from the National FAASTeam Manager
