

Inappropriate Pilot Response to Illusions

- How humans perceive their relationship to the flight environment can result in inappropriate control input.
- In-flight illusions can precipitate inappropriate control inputs.
- Education and training in coping with in-flight illusions can improve pilot response to illusions.
- Vestibular Illusions are particularly dangerous because they can lead to loss of aircraft control.

From I-95 exit 220 turn east on Garden Street (406) approximately three miles, turn left on North Williams Ave. approximately 1 mile on the left. Building 10, in the class room.
