

One-Page Checklist for 2026 Preflights

Preflight Workflow (AC 91-92 Framework)

1. Airspace Review

- ☒ Check Class B/C flows (KMCO, KSFB, KDAB)
- ☒ Verify proposed Daytona Class C changes
- ☒ Identify UAS/MOA boundaries

2. Chart & Procedure Verification

- ☒ Confirm latest 28/56-day cycles
- ☒ Review Chart Supplement remarks (ORL, SFB, DAB)
- ☒ Note IFR amendments (altitudes, transitions, notes)

3. NOTAM Review

- ☒ Refresh EFB data immediately before departure
- ☒ Cross-check FAA vs vendor apps
- ☒ Filter NOTAMs by category: airport, airspace, nav-aid, facility
- ☒ Validate TFR boundaries (launch, VIP, MOA)

4. Weather & Risk Management

- ☒ Assess seasonal weather (frontal/winter patterns)
- ☒ Update personal minimums
- ☒ Identify diversion airports/routes

5. Workload & Communication

- ☒ Pre-brief taxi routes and expected frequencies
 - ☒ Practice “mental loading” for abnormal scenarios
 - ☒ Keep ATC communication concise and proactive
-
