

Air Taxis Are Coming - Are We Ready to Maintain Them?

eVTOL aircraft promise to change short distance aviation, but what happens when they enter everyday commercial service? This presentation looks beyond the “flying taxi” and explores the maintenance realities of electric propulsion, high voltage battery systems, and increasingly software driven aircraft.

We will also compare how the United States, Canada, and Europe qualify aviation maintenance professionals and consider the role of specialized training alongside the FAA A&P certificate.

The Vigilante Room at Sanford Airport is in the Rental Car Building near the Commercial Airline Terminal. If you fly in to KSFB for this WINGS event, you can park at Millionaire FBO and get a courtesy ride over to the seminar's location in the Vigilante Room. Parking validation is available.

A message from the National FAASTeam Manager

Earn your WINGS to get a chance to win a prize. Go to <https://www.wingsindustry.com/WINGS-Sweepstakes> for more info. Join us on Facebook: <https://www.facebook.com/groups/GASafety/>
