Orlando FAASTeam, Jacksonville ATC presents:

Modern Garmin Avionics - Advancing Cockpit Technology and Safety

Joe Stewart will discuss modern cockpit technology and its practical applications in general aviation. Topics will include the role of cockpit displays in providing flight-critical information, engine monitoring solutions, and the integration of updated ADS-B and SiriusXM weather capabilities into a variety of aircraft.

Joe will also review Garmin's next-generation cockpit technologies and innovations, highlighting how these solutions can enhance situational awareness, flight safety, and reliability. Bragg Avionics will have numerous avionics products on display and available for demonstration throughout the evening with avionics experts available to answer questions.

Seminar Duration: Approximately 2½ hours.
