

VFR/IFR Decisions

This presentation designed for pilots of all levels will cover several areas in making decisions about whether to fly VFR or IFR. What is the legal and practical definition of VFR? When is an IFR clearance required and who is authorized to fly it? What are the consequences of flying in weather that is less than VFR? The speaker will discuss real world scenarios to allow the participants to gain insight to making proper go/no-go flying decisions.

Directions: Follow the map link provided to get to the campus at 7200 Pines Blvd. Once there go to building 68 and then room 175 which is the Southern Breeze Cafe.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
