

How to talk on the radio and not sound like a Doofus!

Everyone starts out as a beginner, but there are ways to sound better on the radio, and let controllers know, you know what you are doing. From coping the clearance before taxi, taxiing to the ramp after landing, there are plenty of opportunities to improve your technique, and gain confidence on the radio.

For many people the scariest thing about learning to fly is talking on the radio. Our speaker, will help you learn to be efficient and professional on the radio, with simple techniques and protocols.

Directions: From I-95: exit Pine Blvd - WEST direction, you will find the College on your left. As you enter - turn LEFT on the "parameter road", drive around the parking. The building is cross the road from the Aviation Campos - Building 66 (room 139/156).

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
