FAASTeam and FSDO 19 presents:

Know your E6-B!

The goal of this seminar is to make the participant feel more comfortable doing real life problems with the analog flight computer. This seminar will review the theory and basic operation of the analog E6-B type flight computer using real-life problems. Intended for novice through expert levels, everybody will learn something new!Multiplication/divisionConversionsTime/Rate/Distance problemsFuel burn problemsWind correctionDensity altitudeWeight and balanceTakeoff/landing performance, including using percentages and interpolation
Bring your own E6-B or similar flight computer, although several loaners will be available. Flight computers will also be available for purchase in the adjacent Wayman Pilot Shop.

Directions: On the south side of the Hollywood North Perry (KHWO) airport.

A message from the National FAASTeam Manager
Invite a fellow pilot to the next WINGS Safety Seminar in your area.
