

FAASTeam, South Florida FSDO 19 presents:

South Florida Tower and TRACON Operations and Procedures

With over 1,050,000 operations at MIA and FLL airports combined in 2017, our goal is to create a team oriented experience whether you're talking to a controller for flight following, or flying around on your own.

This seminar will include topics such as:
A look inside Miami TRACON and understanding what a controller sees;
Traffic flows into and out of the South Florida area,
How to benefit from the services available,
Understanding why controllers ask you to do what you do,
And most importantly, a question and answer session.

No matter your level of expertise (general aviation pilot's, airline and corporate pilot's, flight instructors, student pilot's, and enthusiasts), everyone can play a part in creating a safer sky to fly in.

Directions: Check at lobby Information Desk for exact room location of "FAA SAFETY SEMINAR".

The Community Center is located just North of Palmetto Park Road on Crawford Blvd., east of the Palmetto Park Road exit of I-95
