

Weather For Pilots

As aviators we deal with weather on every flight. Weather affects our flight planning in many ways, including routing, performance, and alternates just to name a few. However, do we understand the dynamics of weather? How does weather develop and what impacts does your decisions as a pilot have?

This interactive discussion will delve into those issues to enhance your understanding of weather conditions. More specifically, a focus and better understanding of weather patterns here in Florida.

If you are on I-95, exit Pembroke Pines Blvd. WEST, then left into Broward College, left in the college, around all the parking lots, till the LAST building, that, would be Number 66. Come in.

A message from the National FAASTeam Manager
