

## Hot and Humid

As aviators we deal with weather on every flight. Weather affects our flight planning in many ways, but do we truly understand how elevated temperatures and humidity affect the performance of your aircraft and the impact they have on your decisions as a pilot. This interactive discussion will delve into those issues to enhance your understanding of elevated temperatures and humidity weather conditions.

If you are on I-95, then exit Pembroke Pines Blvd. WEST; turn left into Broward College, left into the college and around all the parking lots till the LAST building numbered 66. Please come in and join us.

### A message from the National FAASTeam Manager
