

Experimental Light-Sport Aircraft (E-LSA) Fly-In

Loss of Control is the leading cause of General Aviation (GA) fatalities. Loss of Control-Inflight fatal accidents occurred 3 times more often than the second most common cause, Controlled Flight into Terrain (CFIT). Join us and find out the best practices in avoiding these types of accidents.

Directions: Proceed to the Humacao Regional Airport located at Humacao, PR. The safety event will be held at the Father & Son Aviation hangar #3 which is located near the entrance to the airport.

A message from the National FAAS Team Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
