

## ATC/CFI/Pilot Forum (Runway Incursions and Pilot Deviations)

Runway safety is a significant challenge and a top priority for everyone in aviation. In the United States, an average of three runway incursions occur daily. Each of these incidents have the potential to cause significant damage to both persons and property. Runway incursions are a serious safety concern and have involved air carrier aircraft, military aircraft, general aviation (GA), and pedestrian vehicles. Several runway incursions have resulted in collisions and fatalities. Fatalities have occurred at both towered and non towered airports. A few seconds of inattention can cause a runway incursion.

**Directions:** North of University Parkway on Right off U.S. 41. Large sign on east side of the road with yellow dolphins. Turn east and go to the end of the road.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

### Event Details

**Thu, Oct 31, 2013 - 9:00 am**
