

# Technology in the cockpit: ADS-B, tablet-based navigation and more...

Today's modern general aviation cockpits have more computers than ... well, they have a lot! We'll talk about the most interesting and typical aides to situational awareness, and how to keep the aides from distracting the pilot from his principal duty: flying the airplane. Learn about ADS-B, tablet-based navigation apps and more.

**Directions:** Located near the fuel farm on the south end of the airport.

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.

## Event Details

Sat, Jun 20, 2015 - 09:00 EDT
