

Tampa FAASTeam presents:

Airport Manatee FAAST Seminar Soft and Short Field Takeoffs

We will be discussing soft and short field takeoffs and landings, weight & balance and over gross avoidance, weather decisions, and aeronautical decision making. Operations from this 3500' turf runway, especially during the summer months, can involve a soft runway. At this seminar we will discuss the proper settings and techniques used on soft and short runways. We will also cover how to perform a weight & balance calculation, and discuss the dangers of operating over the gross aircraft weight or improperly loaded aircraft. Weather decisions and discussions will involve rain, low clouds, and crosswinds. Finally, we will cover aeronautical decision making, including the P.A.V.E and I.M.S.A.F.E. checklists.

Directions: From US-41 and I-275 interchange, head north towards 48X. Hascall-Denke is 2.2 miles north of the Circle-K, on the west (left) side of the road. From 48X, take US-41 south about 1 mile, to Hascall-Denke on the right. Park in the parking lot for Hascall-Denke, then look for the signs for the seminar.
