

Tampa FSDO FAASTeam presents:

Make the Right Decisions!

We will discuss Aeronautical Decision Making or ADM. We'll discuss the History and safety benefits of ADM, as well as present and future ADM methodologies and technologies. And we'll address the challenge of managing multiple informational and operational resources. Orville and Wilbur practiced ADM before, briefly during, and after their historic first flight on 17 December 1903. Nearly 120 years later pilots are still using ADM to determine the best course of action. We will discuss Aeronautical Decision Making or ADM.
