

FAASTeam Tampa presents:

Avionics Capabilities and Limitations

Presentation of the latest Garmin Avionics capabilities and limitations. We will address equipment and operations for both experimental and certified aircraft. Discussion revolves around Risk Mitigation with modern avionics. Emergency situations will be addressed. Interface with autopilots and various system configurations. Pilots, aircraft owners and those building are welcome. There should be time after the presentation for those with specific configuration or equipment questions. Due to limited seating register early.

Check out the attached flyer for some common WINGS flight activities and how to request credit.

Directions: Driving: Go to <http://www.eaa1298.com> and there are directions. Enter off of Route 41, just South of the 41 and Spring Hill Dr intersection (Shell station on the corner). There is a sign just past the Fire Station showing entrance. If Flying in: ask Ground to taxi to the EAA Hangar. Ask for progressive instructions if not familiar with KBKV

A message from the National FAASafety Team Manager
