

FAASTeam presents:

EAA 175 VMC Club Session

The meeting of EAA chapter 175 on December 17th will feature a VMC club session. This is a long-standing program run by EAA, which uses scenarios and case studies as the basis for open discussion about aviation and safe and proficient piloting (the scenarios are chosen so that there's never just one possible answer). It's also a good excuse to swap flying stories with each other! The December 17th session will focus on approaches to landing. How do we ensure we are in harmony with all other traffic that is en route to the same airfield? We'll take a look at scenarios which test our decision-making skills for this vital phase of flight, including sharing airspace with large jets, approaching non-towered airfields and landing at night. Bring your iPad with Foreflight (or other favorite resource) and your pilot brain along to the session and let's see how much we can learn from each other.

Directions: EAA chapter meeting building (shared with Civil Air Patrol).
