

Tampa FSDO FAASTeam presents:

Aeronautical Decision Making and SRM

Even “Small” Decisions Can Have a Large Impact on Flight Safety.

Many pilots get in trouble not because of deficient “physical airplane” or “mental airplane” skills, but because of faulty aeronautical decision-making (ADM) and risk management skills. Why should that be so? One reason is that ADM, unlike physical airplane and mental airplane skills, is an invisible process. An instructor or examiner can easily observe and evaluate your ability to land the aircraft (physical airplane) or your proficiency in programming the GPS (mental airplane). ADM, on the other hand, is a process that takes place inside the pilot’s brain. Because ADM is harder to observe and evaluate than basic aircraft control and systems skills, it sometimes gets less emphasis than it deserves.

Pilots have received little training on how to successfully manage a sudden and stressful event that requires quick and accurate decision-making. Aeronautical decision-making training can improve the outcome of these types of events. Join us for a discussion on these topics and increase your ability to properly assess risks and make the right decisions.

Event Details

Wed, Jan 25, 2023 - 14:00 EST

Happy Hangar Cafe

4241 Birdsong Blvd

Lutz, FL 33559

Contact: SAMUEL A. GROSS

(925) 785-1420

sam.aviate@gmail.com

Select #: SO35119586

Representative SAMUEL A. GROSS

Directions: From the south via I-75: exit Hwy56 and proceed west to Hwy54. Turn Right on Hwy54 and then turn right on Magnolia Blvd and then right on Songbird Blvd.
From the north via I-75: exit Hwy54 and proceed to Magnolia Blvd and turn left. Then turn right on Songbird Blvd.
If you want to order food prior to the seminar, please arrive by 1:30 as the cafe closes at 2 pm.
Prior to attending a safety seminar please review and abide by current CDC, State, and Local health guidelines.
