

Tampa FAASTeam presents:

CFI Forum Flight Training

2023 CFI Forum 1st Quarter, let's talk about flight training. We will discuss instructional best practices for for teaching aircraft limitations. Exceeding aircraft operational limitations can result in irreversible damage to the aircraft and components. Sometimes such damage has led to structural failures, aircraft accidents, and loss of life. Aircraft stress and fatigue resulting from exceeding operational limitations is cumulative and older airframes are especially at risk. Don't forget to download the attachments! Have your Students Register with FAASAFETY.gov and join the WINGS program. Look for my next CFI forums, One a Quarter!

Directions: Please ask for escort to the north conference room by speaking with the Customer Service Representative in the FBO at the front counter.

A message from the National FAASafety Team Manager

Earn your WINGS to get a chance to win a prize. Go to www.wingsindustry.net for more info.
