

FAASTeam presents:

EAA 175 VMC Club Session

The meeting of EAA chapter 175 on June 17th will feature a VMC club session. This is a long-standing program run by EAA, which uses scenarios and case studies as the basis for open discussion about aviation and safe and proficient piloting (the scenarios are chosen so that there's never just one possible answer). It's also a good excuse to swap flying stories with each other! The June 17th session will focus on fuel planning and management. What do we need to do on the ground and in the air to ensure we have all the gas we need to make it where we want to go? Bring your iPad with Foreflight (or other favorite resource) and your pilot brain along to the session and let's see how much we can learn from each other.

Directions: EAA chapter meeting building (shared with Civil Air Patrol).
