

Operations at Non-Towered Airports

Operations at Non-Towered Airports - What You Really Need To Know, Non-towered airports are those not served by an operating air traffic control (ATC) tower and are much more common than towered fields. Millions of safe operations in all types of aircraft are conducted at non-towered airports in a variety of weather conditions. The process works because pilots put safety first and use recommended procedures.

There are advantages and disadvantages of no ATC services at an airport. Join us for an interactive discussion regarding the do's and don'ts of operating at a non-towered airport, airspace considerations, and weather considerations.

From the south via I-75: exit Hwy56 and proceed west to Hwy54. Turn Right on Hwy54 and then turn right on Magnolia Blvd and then right on Songbird Blvd.

From the north via I-75: exit Hwy54 and proceed to Magnolia Blvd and turn left. Then turn right on Songbird Blvd.

If you want to order food before the seminar, please arrive by 1:30 as the cafe closes at 2 pm.
