

FAASTeam presents:

# **Weather Tools and Issues in the Caribbean - An Update from NOAA**

Weather continues to be a challenge to pilots in the Caribbean. The GA aviation community continues to face issues like the Sahara dust and our pop-up rain storms created by the clouds and fronts in the area. These can easily fool pilots into believing that they are going out for a clear VFR trip, when in fact, after a few thousand feet in the air, they encounter the Sahara dust or a storm and to their surprise, they lose the horizon view or the ground can not be seen. We have invited José Alamo from our local NOAA office to discuss local climatology, how synoptic-scale features affect the local weather, and some exciting new weather analysis products that have been available in the mainland USA and are now being brought to us in the Caribbean.

**Directions:** THIS EVENT IS BEING HELD AT ISLA GRANDE FLYING SCHOOL IN THE UPSTAIRS CLASSROOM. Proceed towards the Fernando Luis Ribas Dominicci Airport at Isla Grande, PR. As you enter the airport area, turn to the right to take the main road TO THE NORTH SIDE OF THE AIRPORT and continue on the road past the cruise ship ports until you reach the Isla Grande Flying School. The meeting will be held in the classroom on the 2nd floor.

## Event Details

**Tue, Mar 3, 2020 - 18:00 AST**

**Isla Grande Flying School**

Fernando Luis Ribas Dominicci  
Airport

North Side of the Airport

San Juan, PR 00907
