

Pilot Deviations at the David Wayne Hooks airport, where they happen and how to avoid them.

Currently the David Wayne Hooks airport is a leader in the United States when it comes to surface deviations. Surprisingly the majority of pilot deviations at DWH are caused by pilots based in the greater Houston area. For this seminar we will discuss the places on the airport that these problems occur, the pilots and aircraft most at risk, and how to avoid a potentially dangerous situation while operating at Hooks airport.

Directions: West Houston Airport Terminal Building, upstairs. I-10 to Barker Cypress, go north on Barker Cypress to Groschke Road and turn right. Airport entrance is on the left.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
