

SGR FAAS Team presents:

Critical Decision Making (CDM)

Critical Decision Making (CDM) seminars take an intense look at general aviation safety and create a formal method of conducting individualized safety routines for each pilot. This is a highly interactive seminar with lots of thought provoking discussion and analysis. The seminar concludes with the group understanding and quantifying the various factors that add risk to a flight and how to minimize or eliminate the risk. This isn't just for low time pilots. Higher time pilots often add useful experience to the discussion.

And, although low time pilots often lack the experience that aids judgment, higher time pilots often use experience to justify risky behavior. We encourage pilot (and flying partner) participation.

Directions: NEW LOCATION for SGR Safety Seminar is ANSON AVIATION, Sugar Land Regional Airport. Turn off Hwy 6 S. onto Jim Davidson Rd. and drive to first parking area on the right in the General Aviation Area.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
