

N/A presents:

WAAS for the Modern Aviator

Registration only available at
www.flyhpa.com/waasThis event has a cost.
Please go to the above address for details and
registration.

Want to know more about WAAS? Wide Area Augmentation System is one of the greatest innovations for general aviation in recent years. You will learn about all types of approaches that can be flown with WAAS, including LNAV, LNAV+V, LNAV/VNAV, LP, and LPV. Includes a Q&A session & detailed discussion of WAAS approaches for Garmin avionics. Learn all of this and more: How to set up and fly a WAAS approach What is VNAV and what does the VNV key do? How to utilize VNAV prior to receiving the glidepath Tips and tricks for the Garmin G1000 and Garmin 430/530 What does the go-around button do? Learn what all the notes mean on the approach charts? Which minimums line do you use? Why are the minimums different? What happens if you lose the WAAS signal? How to let the autopilot do all the work Which is better? ILS or WAAS?

Directions: Seminar will be in classroom at main terminal. 9 am-noon
