

# Automation and You - Strategies for Effective Automation Management

Many pilots under-use automation, while others over-use automation. In this seminar we will explore automation best practices as well as common pitfalls. We will discuss both new technology and old, including autopilots, GPS (panel mount and handheld), iPads, and even paper charts. Whether your airplane is brand new with all the bells and whistles, or older with an aging avionics install, we'll discuss it.

**Directions:** Anson Aviation is located south of the Sugar Land Regional Airport main terminal.

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
