

## X Marks the Failure

Gentry Shelton, Commercial Pilot, CFII, MEI, High Performance Aviation, discusses how modern technology has made our cockpits more advanced. In this seminar he will discuss how to deal with failures in technically advanced aircraft. This seminar is a good review of the systems involved when the red X's appear on highly sophisticated equipment. Additionally this seminar is a good review on which instruments give pertinent information, how they get their input and what it means when the information given doesn't make sense.

**Directions:** Anson Aviation is located south of the Sugar Land Regional Airport main Terminal Building.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
