

Surprise Surprise - Loss of Control

It's hard to imagine losing control of an airplane in flight. But far too frequently that is exactly what happens and usually with serious results. Most loss-of-control accidents are fatal. These accidents happen in both VFR and IMC conditions, during the day and at night. They are not limited to inexperienced or VFR only pilots. This presentation will explore some of the factors that can lead to loss-of-control and will provide some practical steps that can be taken by pilots to help avoid LOC. After the presentation enjoy a gourmet hamburger and social time with fellow aviation enthusiasts.

Directions: Hamburgers by Gourmet, 1360 NASA parkway, Houston, TX 77058, on the south side of NASA Parkway between Akimi Sushi and Starbucks across the street from Space Center Houston.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
