

Loss of Control

John Hollingshead, Commercial Pilot, CFII, MEI, High Performance Aviation will explain that loss of control can occur in any phase of flight, in any aircraft, with pilots of any level of certification and experience. This presentation will discuss strategies for prevention of loss of control through planning and situational awareness as well as techniques for recovery from unexpected loss of control.

Directions: Anson Aviation Terminal is located south of the Sugar Land Regional Airport main Terminal Building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
