

## Emergency Decision-Making

The decision-making process is complicated. It requires investments of time and mental resources. It is relatively inefficient. What tools can the single pilot use to increase decision-making effectiveness, especially under emergent and stressful situations. The presentation will examine types of human behavior and decision making, and relate them to single pilot operations. The presentation will also suggest methodologies for avoiding the hazards of making decisions in emergency situations.

**Directions:** Anson Aviation Terminal is located south of the Sugar Land Regional Airport main Terminal Building

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
