

Oil Analysis - Just What Is Your Engine Trying To Tell You?

Wayne Odegard, Vice President and General Manager of Aviation Laboratories, Inc. (AvLab), will talk with us about oil and oil analysis. AvLab is the leading provider of aviation-specific testing, and the procurement and distribution of chemical and maintenance products, for the aviation industry. They are familiar with all types of aviation engines, and maintain a large quantity of data about engine wear and anomalies you or your A&P might find. He will discuss how the analysis they do of both oil and oil filters, as well as their fuel analysis, can help save money, your engine, and potentially, lives.

This seminar provides 1.5 hours credit.

[West Houston Airport](#) is located north of I-10 between Hwy 6 and Barker Cypress Road.
