

Altitude and Attitude-My Emergency Landing in the Rockies

Flying in the mountainous terrain of Colorado, Robin Clearman, private, instrument-rated pilot with a mountain flying certification, encountered a critical situation caused by reduced air density at high altitude. He will discuss the conditions leading up to the emergency, the split-second decisions that had to be made, and how he executed a controlled crash landing to maximize safety. This presentation will highlight the unique challenges of mountain flying, the importance of preparedness, and key takeaways for pilots operating in high altitude environments.

This event delivers 1.5 hours of aviation safety topics.

[Anson Aviation](#) is located south of the [Sugar Land Regional Airport](#) Main Terminal Building. The meeting will be held in the Anson Aviation conference room.
