

Part Two: Hands On - Putting Out Fires

Continuation of series on 101 ways to die in and around airplanes. This three part series is about fires, how to prevent them and if one occurs what to do. In Part one we covered fires in and around the airport. Now that you have set yourself or others on fire, Part two will be a hands on outside program where you will actually put out one or more fires. I plan to have open and enclosed fires (such as you might expect in the aircraft interior or engine compartment) that you will put out with expert guidance. In Part three I will discuss in-flight fires. Roger Slayton, airport manager, firefighter and pilot, Kevin Lane, Paragould Fire Chief, and pilot, and Bill Trip, owner of Absolute Fire Protection in Paragould, will be assisting with these programs.

Directions: At the FOB, brick building by the flagpole

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
