

## Did you see that??!?!

In this presentation we will discuss Loss of Control Accidents and recommendations from the Loss of Control Work Group. We will define and discuss stabilized approaches and go-arounds. Finally, we will give you some tips and tricks that will help you to avoid loss of control in any aircraft. We will also review aircraft operations at airports, specifically agricultural aircraft and what we should expect. We will discuss traffic pattern entries, how to exit the traffic pattern and recommended radio communications.

**Directions:** Carlisle airport is just Northeast of Carlisle on North side of I40. Cross I40 going North from Carlisle - turn just past graveyard - following blue airport signage - continue East to airport. Large hangar type building just west of the main FBO trailer - West side of main entrance gate. There is a walk through gate on West side of drive through gate.

### **A message from the National FAASTeam Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

### Event Details
