

Surprise! Surprise! - Human Factors Training

In this seminar we'll address recommendations from the General Aviation Joint Steering Committee – a government / industry group that analyzes GA accidents and incidents. The goal is to improve knowledge of safety risk management, emergency procedures & maneuvers, and human factors can reduce the numbers of fatal GA Loss of Control Accidents. We'll be watching video of some common GA activities and discussing what we see. We'll get to know a pilot, his family, and some of his associates and we'll go along with them on a flight to a mountain airport in rural Virginia. But before that, you'll see some owner/operator maintenance activity.

Directions: This seminar will be held in the main terminal building at the Melbourne Airport as part of the Melbourne Fly-in.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
