

FAASTeam presents:

Northwest Arkansas Regional Airport Runway Safety Action Team Meeting

Runway incursions are a major factor in aviation safety. While many things have been done to reduce the accident rate in General Aviation and the Air Carrier Industry, both sides of the aviation house are still experiencing far too many runway incursions. This could be the result of "Read back - Hear back" issues, poor airport signage, pilot inattention/knowledge, expectation bias, or a combination of factors. Runway safety is a major concern for all pilots and if you have been around aviation for a long period of time you have probably seen some close calls on the runways and taxiways, or even been involved in some yourself.

Pilot airspace deviations continue to be a major risk in the national airspace system. To reduce the chance that you might be involved in an airspace deviation incident, you are highly encouraged to take an on-line learning center course such as ALC 42, ALC 154, and ALC90 on www.faasafety.gov, or search the learning library for associated guidance on airspace incursions. Remember, safe and prudent airmen have superior situational awareness and have a plan to keep it that way.

Pre-registration is strongly encouraged to help the facilitators in planning sufficient seating and handout materials. Please click the link below to

Event Details

Tue, May 1, 2018 - 13:00 CDT
Northwest Arkansas Regional
Airport Terminal

1 Airport Blvd
Bentonville, AR 72712
