

## Second Monday Aviation Safety Huddle - 2025 Series

Join us each month throughout 2025 for our Second Monday Aviation Safety Huddle. Every meeting will focus on current aviation safety topics, regulatory updates, best practices, and case studies designed to keep pilots, instructors, and aviation enthusiasts informed and proactive. This month we will cover Nontowered flight operations. This presentation promotes aviation safety. It will discuss good operating practices and procedures for pilots operating at an airport without an operating control tower. Observing a standard traffic pattern and using CTAF procedures, as presented in this presentation, will improve the safety and efficiency of aeronautical operations at airports without operating control towers.

EAA Chapter 165 Hangar at North Little Rock Airport. If you drive in, use gate 20 which is just a block south of the main airport entrance on Remount Road
