

Arkansas Flight Safety Stand-Down

This interactive Arkansas Flight Safety Stand-Down uses a real-world cross-country scenario to guide pilots through the complete flight planning process. Participants will work in teams to plan a same-day VFR trip while addressing airworthiness, pilot readiness, fuel planning, weather, risk management, UAS activity, and military operations near Fort Smith. After each focused segment, teams refine their plan to see how decisions evolve as new information is introduced. The goal is to provide a practical, repeatable framework for managing risk in today's complex shared airspace.

The main parking apron south of the fuel pumps is designated for fly-in participants. The Just Plane Fun hangar is immediately adjacent to that apron on the east side of the airfield.
