

Second Monday Aviation Safety Huddle - 2025 Series

In 1934, a single misunderstood hazard forced down 26 passenger planes. It was carburetor icing, a silent killer that became one of aviation's most dangerous blind spots.

What is today's "carburetor icing" blind spot?

Spot the unseen: Uncover current industry blind spots.

Challenge assumptions: Looks beyond standard safety metrics.

Anticipate the next hazard: Identify tomorrow's defining hazard today.

EAA Chapter 165 Hangar at North Little Rock Airport. If you drive in, use gate 20 which is just a block south of the main airport entrance on Remount Road
