

FAASTeam presents:

**2013 NWS Lubbock Aviation Weather Safety Workshop
(Rescheduled due to government shutdown)**

The NWS is thrilled to announce our fourth annual aviation weather workshop for pilots and other aviation specialists. This year's series of talks will focus on techniques and tips for the boundary layer...the part of the atmosphere closest to the surface and thus most critical to flight operations. In addition, we will offer a virtual tour of the WSR-88D radar. So, if you ever wondered what was up in that golf ball at KLBB airport, here's where to find out! Tours of the Lubbock NWS office will be available after the presentations to US citizens. Foreign nationals are also welcome to attend the tour, but will need to arrange for proper clearance by January 10th.

Directions: To be held in the Science Stage on the south side of the Science Spectrum Museum on Texas Loop 289 in South Lubbock between Indiana and University. Park on south side of building off 74th street. Coords 33.527762 N 101.876610 W

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
