

Way to Go Einstein...some thoughts on energy management

This presentation discusses energy management as it relates to operating an aircraft in flight and on the ground. The idea is to build up the energy in a sufficient amount to get into the air and then dissipate it smoothly when we get back on the ground.

Directions: Take the main entrance to the Big Spring Airport and follow the road west to the terminal building

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
