

## Way to Go Einstein!!

Energy Management is a very important part of getting your aircraft off the ground and safely back on the ground again. This presentation will cover some practical, common sense techniques that will help you recognize the sources of energy we use to fly and how to manage them properly during takeoff, cruise, and landing.

**Directions:** The Southwest Technology hangar is located just south of the terminal building.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
