

Flight Instructor Open Forum

This program will provoke lively discussion of issues associated with the explosion of tablet computer-based flight software and hardware.

We do recognize that eventually paper charting will be replaced by electronic displays. We also recognize that many pilots are already using electronic alternatives to paper. The discussion centers on how to safely integrate new with traditional technologies to effect safer flight operations for everyone.

Directions: Exit South off Loop 289 onto Slide Road. Take the first right onto 68th Street. Take a right onto Aberdeen St. (just across from Hobby Lobby) Go to the second glass building on the left. Enter the West door and follow the signs.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
